Loïc BRAUD Game Programmer

loic.braud95@gmail.com | +33 06 79 29 76 62 | Paris region | Portfolio | LinkedIn

SKILLS

Programmation

Game development :
- *Unreal Engine 5* (C++, *Blueprint*)
- *Unity* (C#)

Graphics API :
- *OpenGL / Vulkan*

Game engine development (C++)

Optimisation et Debugging :
- *Multithreading* (C++)
- *Debugging et profiling* (CPU, GPU)

Networking:
- TCP (C#)
- Unreal Engine 5 Networking (C++, Blueprint)

Project management

Versioning :
- *Git (GitHub, GitLab, Fork)*
- *Perforce*

Agile et Scrum

Documentation

Sciences

Advanced mathematics

Physics :
- Wave mechanics
- Movement and force mechanics

PROFESSIONAL EXPERIENCE

Game Master VR — MindOut

one month internship — 06/2025 | Paris, France

- Welcomed and assisted customers throughout their VR experience.
- Solved technical issues

EDUCATION

Master's in Game Programming

Isart Digital — 2023 - 2028 | Paris, France

- Mathematics
- Physics
- Programming

LANGUAGES

French
Native speaker

English
Professional proficiency

INTERESTS

Ice hockey (11 years, national level)

Saxophone (10 years)

Video games (single/multi player, adventure, RPG)

Escape games (physical and board games)

PROJECTS

Iris Engine

Game engine developer — 02/2025 - 05/2025
ISART Digital, Paris

Visual Studio - C++
Developed a fully functional and customized game engine with a team of programmers.

- Implemented **Scene Entity Component System**
- Implemented the **Physics Engine**
- **Documentation**
- Applied **Agile and Scrum** methodologies

Third Person Shooter

Game developer — 11/2024 - 12/2024
ISART Digital, Paris

Console, PC
Unreal Engine 5 - C++, Blueprint
Switch Development Kit

- **Gameplay :** implemented shooting and movement mechanics
- **UX/UI :** implemented menus, HUD
- **Asset integration:** models and sounds

Solar system simulation

Game developer — 02/2025 - 02/2025
ISART Digital, Paris

Unity - C#
Created an interactive simulation of the solar system
- Implemented user controls
- Applied **formulas** for celestial body movement
- Implemented **calculations** for force visualization
